Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1 382 254 A1 to Park, et al. in view of Kean (US 3,812,776). The EP 1 382 254 A1 reference to Park, et al. discloses the claimed subject matter except for an adjusting

member or bolt screw-engaged with a screw hole. The patent to Kean discloses that it is known in the art to have provided an adjusting member (48 or 58) that is screw-engaged with a screw hole. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided a screw hole at the end of each tray of Park, et al. with an adjusting member in the manner suggested by Kean in order to maintain a predetermined gap between the stationary tray and the movable tray when the movable tray closes, if desired.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents are cited for further teachings of devices whose structure is similar to that instantly disclosed.
